

DURGESH UNDE

AI Training & Evaluation Specialist | Applied GenAI & LLM Systems Engineer

+91 93223 23097 | Shirampur, Maharashtra, India | durgeshunde@gmail.com

EDUCATION

Higher Secondary Certificate (HSC)
Science Stream | 78.50% | 2020 – 2022

Secondary School Certificate (SSC)
State Board | 85.20% | 2020

TECHNICAL SKILLS

AI & MACHINE LEARNING

- AI Data Annotation & Grounding
- LLM Output Evaluation & RLHF
- Human-in-the-Loop (HITL) QA
- Alignment Dataset Curation & QA
- 4-Bit QLoRA Fine-Tuning (PEFT)
- Weight Fusion & Safetensors
- Dense Grounding & Ref-Expression
- AI Voice & Multilingual Data

PROGRAMMING & SYSTEMS

- Python (PyTorch, Transformers, PEFT)
- Win32 API & OS Automation
- SQLite Database Engineering
- HTML5 / CSS3 / JavaScript (ES6+)
- Microsoft Edge WebView2
- Git & GitHub Version Control

PROFESSIONAL SKILLS

- Meticulous Quality & Guideline QA
- Analytical & Deductive Reasoning
- Systems & Pipeline Architecture
- Fast Debugging & Root Cause Analysis
- AHT Optimization & SLA Delivery

LANGUAGES

- English** (Advanced / C1 Proficiency)
- Hindi** (Advanced / Professional)
- Marathi** (Native / Fluent)

CERTIFICATIONS

IELTS Academic
Overall Band: 7.5 | CEFR: C1

Listening 7.5 • Reading 8.0
Writing 6.5 • Speaking 7.0
IDP Education | Sep 2025

PROFESSIONAL PROFILE

Hands-on **AI Data Annotation & Model Evaluation Specialist** engaged at **Innodata India Pvt. Ltd.** (with prior background at **Outlier AI**), combined with proven practical competence in end-to-end **open-source Large Language Model (LLM) fine-tuning, weight fusion, and autonomous systems architecture**. Experienced across dense-structured grounding, reference-expression annotation, structured RLHF human feedback, and dataset QA pipelines. Built and deployed full-stack autonomous desktop AI engines with native Win32 OS integration and persistent episodic memory on edge consumer hardware. Certified with **IELTS Academic Band 7.5 (C1)** English fluency and multilingual proficiency in Hindi and Marathi.

EXPERIENCE

AI Data Annotation & Evaluation Contractor

August 2026 – Present

Innodata India Pvt. Ltd. | Full-Time Equivalent Contractor

- Perform high-precision data annotation, content moderation, and quality evaluation for enterprise AI training pipelines.
- Execute advanced reference-expression and grounding workflows, including **dense-structured grounding**, CUA-general grounding, and high-resolution spatial annotations.
- Evaluate LLM-generated outputs for factual grounding, contextual consistency, alignment, safety, and strict guideline adherence.
- Apply project-specific rubrics to ensure benchmark training data output while consistently meeting assigned **AHT and SLA targets**.
- Conduct linguistic, grammatical, and semantic evaluations across multi-turn human-AI conversational datasets.

AI Training & Data Annotation Contributor

2026 – July 2026

Outlier AI | Remote Contractor

- Contributed to frontier generative AI alignment workflows through structured comparative human feedback and model output ranking.
- Conducted multimodal data labeling, image annotation, and quality assurance under strict guideline rubrics.
- Curated multilingual speech and voice dataset components across English, Hindi, and Marathi prompts.

FEATURED AI ENGINEERING PROJECT

XYVERION 3.0 — Autonomous Desktop AI & Local SLM Engine

Production Live Build

Python • PyTorch • Hugging Face Transformers • PEFT • Win32 API • SQLite • WebView2

- Proprietary Alignment Dataset Curation:** Curated and audited a 1,749-pair multi-turn dataset covering deductive reasoning, tool schemas, and strict creator attribution guardrails.
- Quantized Fine-Tuning (4-bit QLoRA):** Fine-tuned a causal LLM on consumer GPU hardware (NVIDIA GTX 1650 4GB) using NF4 quantization, gradient checkpointing, and LoRA ($r=16$, $\alpha=32$), driving validation loss from **1.6048 to 1.2473** over 85 optimization steps.
- Direct Safetensors LoRA Weight Fusion:** Developed an automated post-training pipeline fusing 112 LoRA adapter shards directly into base model weights, achieving zero runtime adapter overhead.
- Sub-0.3s Native Windows OS Voice Controller:** Engineered an ultra-low latency Win32 controller supporting 55+ natural voice commands (app lifecycle, GDI screenshots, volume/media keys, and safe Recycle Bin deletion via SHFileOperationW).
- Desktop Client & Episodic Memory:** Packaged as a frameless, glassmorphic desktop app using Microsoft Edge WebView2, persistent SQLite episodic memory, and automatic GPU VRAM flush on exit.

AI RESEARCH & TECHNICAL INQUIRIES

- Fake News Detection via ML:** Semantic text classification and ensemble models for deceptive content mitigation.
- ML Threat Detection:** Network anomaly classification and proactive malware intrusion defense.
- AI in Healthcare Diagnostics:** Evaluation of deep learning architectures in computer vision diagnostics.
- Evolution of Generative Models:** Comparative survey on scaling laws, RLHF alignment, and agentic workflows.

ADDITIONAL EXPERIENCE

Digital Solutions & Web Applications

2022 – 2024

Freelance & Self-Initiated Projects

- Engineered interactive web applications using modern HTML5, CSS3, JavaScript, and dynamic API integrations.
- Designed visual identities, logos, and marketing digital assets for regional small businesses with Photoshop and Canva.
